# EFFECTIVE AND PROPORTIONATE DMA IMPLEMENTATION

11 January 2023

cerre

Centre on Regulation in Europe

# WELCOME

*by Bruno Liebhaberg  
CERRE Director General*

cerre

Centre on Regulation in Europe

# OPENING KEYNOTE SPEECH

*Andreas Schwab  
Member of the European  
Parliament*

cerre

Centre on Regulation in Europe

# OPENING KEYNOTE SPEECH

*Alberto Bacchiega  
Director, DG COMP,  
European Commission*

cerre

Centre on Regulation in Europe

# PANEL 1: DESIGNATION OF GATEKEEPERS AND PROCEDURE

*Richard Feasey, CERRE Senior Advisor  
and Giorgio Monti, CERRE Research Fellow*

# GATEKEEPER DESIGNATION

- Designation **per gatekeeper** or per CPS
- **Symmetric** evidential standards for the **rebuttal of the quantitative presumption** by platforms and the Commission
- **End-users** calculation

# PROCESS AND INSTITUTIONAL DESIGN (1)

- **Oversight** and compliance tools
  - Effective **compliance report**
    - Gatekeepers to demonstrate effectiveness
    - Compliance as an evolving task for gatekeepers/Commission
      - Adapt to changing market conditions
  - Governance of **regulatory dialogue**
- **Responsive enforcement**
  - Focus on **persuasion** first, fines an instrument for unwilling compliance

## PROCESS AND INSTITUTIONAL DESIGN (2)

- **Participatory enforcement**
  - At each stage, **third parties** should be able to comment (and have meaningful info to do that)
  
- **Institutional design**
  - **National authorities:** complaints and joint investigation teams
  - **DMA High-Level Group:** legal consistency across digital law instruments and case coordination

# COFFEE/TEA BREAK

Next session starts at **16.00 CET**

# PANEL 2: SELF-PREFERENCING AND SWITCHING TOOLS

*Martin Peitz, University of Mannheim  
and Alexandre de Streel, CERRE Academic Director*

# THE SELF-PREFERENCING PROHIBITION

## Article 6(5)

*The gatekeeper shall not treat more favourably, in ranking and related indexing and crawling, services and products offered by the gatekeeper itself than similar services or products of a third party. The gatekeeper shall apply transparent, fair and non-discriminatory conditions to such ranking and related indexing and crawling.*

# RECOMMENDATIONS ON SELF-PREFERENCING

- Do not to use this prohibition as *carte blanche*; do not engage in mechanistic enforcement.
- The application of Article 6(5) could be restricted to the design of rankings as a non-price strategy.
- The prohibition should apply on the end user *and* the business user side.
- It can be challenging to detect self-preferencing bias as opposed to legitimate differential treatment. Identify acts of true self-preferencing; i.e. such practices that are likely to be against market contestability and the long-term interests of consumers.
- Use guidance from economics to specify adequately, under Article 8 of the DMA, the self-preferencing prohibition.

# RECOMMENDATIONS ON SWITCHING TOOLS AND CHOICE SCREENS

- **Legal clarifications on scope**
  - **Non-standards browsers** such as search app and in-app browser
  - **Other services** than browser, VA and SA: within browser default
  - **Non proprietary default**
- **Effective mechanisms**
  - **Design and architecture** of switching tools
  - **Reversibility** possibility
  - At every **first use of new device** and at **no charge**
- **Avoiding unintended consequences**
  - Misleading third-party prompts and **slamming**
  - Excessive prompts and **choice fatigue**
  - Harming the **small platforms**

# PANEL 3: ACCESS TO DATA AND INTEROPERABILITY

*Marc Bourreau, CERRE Academic Co-Director  
Alexandre de Stree, CERRE Academic Director*

# RECOMMENDATIONS ON INTEROPERABILITY

- **Legal clarifications** needed
  - **Geographical scope:** EU or beyond?
  - Process to handle **requests for vertical interoperability**
  
- **Effective mechanisms**
  - Access and interface **managed by gatekeeper** under equivalence of input requirement when proportionate
  - **Licence** regime for access seekers
  
- **Avoiding unintended consequences**
  - Reducing **investment** and innovation with free vertical interoperability
  - Reducing **multihoming** with horizontal interoperability

# RECOMMENDATIONS ON DATA PORTABILITY

- Legal **clarifications**
  - **Scope:** which data, in particular observed data, context, adversarial portability
  - User **consent:** granularity, by business users
  
- Effective **mechanisms**
  - **Combining** portability with privacy, security and integrity
  - Open **standards** and protocols
  - Measurement of availability and **performance**
  
- Avoiding **unintended consequences**
  - Crowding out Personal Information Management Systems (**PIMS**)

# RECOMMENDATIONS ON SEARCH DATA ACCESS

- Legal clarifications
  - **Material scope:** data, scale, timeliness, beneficiaries
  - **Geographical scope:** EU or beyond
  
- Effective mechanisms
  - Combining **contestability** with **privacy and security**
    - **Technical:** K-anonymity, differential privacy, synthetic search logs
    - **Institutional:** trusted data intermediaries and data sandboxing
  - Negotiation framework to determine **FRAND**
